Intelligent Hand Sanitization

Mirador HEALTH

Innovative Technology Ensuring Life Saving Compliance

The Mirador Health solution offers real impact and easy implementation.

The Mirador Health system pairs logistical intelligence and Bluetooth technology with its hand sanitization liquid dispenser and BLE caregiver ID badges. Healthcare delivery organizations can monitor, track, and report real-time hand sanitization events that benefits both patients and the bottom-line. Mirador Health drives healthier outcomes—with no changes in protocols or usual operating procedures.

+ Hand Sanitizing Dispenser

The Mirador Health solution offers real impact and easy implementation. Each dispenser has proprietary BLE and Wi-Fi technology which connects to the system, enabling recording, tracking, and monitoring of each sanitization liquid dispersion by person, place, time, and department. Collected data is encrypted and uploaded to the cloud for storage and reporting.

+ Smart Bluetooth ID Badge Tag

A wearable device attaches to any ID badge, enabling data collection on all physician, nurse, and caregiver sanitization activity by time and location.

+ Sanitization Liquid

Mirador Health's primary liquid sanitizing solution is a citrus-based gel with 70% alcohol by volume that is soft on the hands, absorbs quickly, and meets all regulatory requirements.

+ Dashboard

Customizable, user-friendly dashboards gather real-time data on hand hygiene workflow behaviors, calculates compliance and missed opportunities, and strategically pinpoint where corrective action is required at an individual, team, department, or healthcare system level. Information can be made anonymous. Equipment monitoring, such as liquid levels, battery levels, and proper operation is also reported.
